

## Chromebooks | How to Connect To Wi-Fi & Log-in

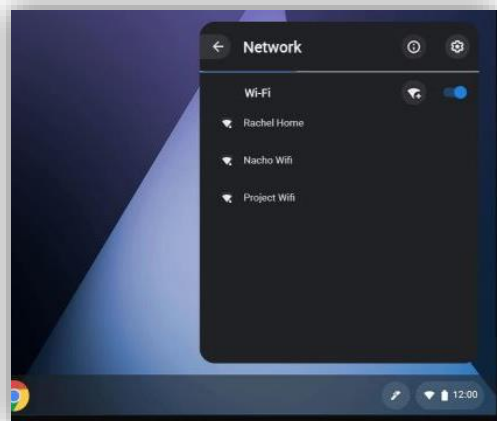

1. While at home, open your Chromebook, then click on the settings panel in the bottom right corner of your screen.

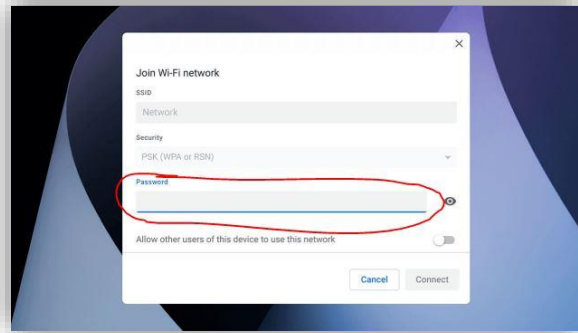

2. Click on "Not Connected" and "No Networks."

3. Select your Wifi network from the list. The list may only show your Wifi Network.

4. If your Wifi network requires a password, enter the password for your Wifi, then click "Connect." If you do not know your home Wifi key, it may be listed on your modem or router. If not, check with your internet service provider (AT&T, Comcast, Cox, etc.).

5. After connecting to the Wifi, log into the Chromebook with your Google account information. Use your Google email address as the username and use the password that was provided to you by your school. If you have problems logging in, please have your parent or guardian contact your teacher for your password.
